

## Amendment according to PCT Article 34

### 4. Object of Amendment

#### Descriptions and Claims

### 5. Contents of Amendment

- (1) The inventors amend Example 1 to Test Example 5 in page 6 of descriptions, Test Example 5 to Test Example 6 in page 7 of descriptions and Example 2 to Example 1 in page 8 of descriptions.
- (2) The inventors amend "A transcriptional factor" in claims 1 to 3 to "A cancer treatment drug", delete claim 4 and add new claims 5 and 6.

### 6. List of Attached Documents

- (1) Descriptions: pages 6, 8, 9; total 3 pages
- (2) Claims: total 1 page

### Claims:

1. (amended) A cancer treatment drug comprising a transcriptional factor as an effective component, which comprises p53 or a mutated type p53, wherein one or more amino acids are deleted, substituted or added with respect to the amino sequence of p53, and clathrin heavy chains.
2. (amended) The cancer treatment drug of claim 1, wherein at least the serine residue at amino acid position 46 is substituted in said mutated type p53.
3. (amended) The cancer treatment drug of claim 2, wherein said serine residue at amino acid position 46 is substituted to phenylalanine.
4. (deleted)
5. (amended) A method for treating cancer comprising injecting a transcriptional factor, which comprises p53 or a mutated type p53, wherein one or more amino acids are deleted, substituted or added with respect to the amino sequence of p53, and clathrin heavy chains to a cancer cell, or injecting clathrin heavy chains to a cancer cell.
6. (new) The method for treating cancer of claim 5, wherein at least the serine residue at amino acid position 46 is substituted in said mutated type p53.
7. (new) The method for treating cancer of claim 6, wherein said serine residue at amino acid position 46 is substituted to phenylalanine.
